게시판 사용자

일부 [스크린샷](#) 들은 영어 버전과 유사한 것으로 교체되어야 함

기능 개요

티키 내부의 가장 흥미로운 기능 중 하나인 게시판 시스템에 오신 것을 환영합니다, 개념은 매우 간단합니다:

- 게시판은 한 주제에 대한 토픽 (**대화목록** 혹은 **쓰레드**라고 불리기도 함) 들의 묶음입니다. 제품, 영화, 스포츠, 날씨 등 원하는 것은 무엇이든지 논의하기 위해서 게시판을 만들 수 있습니다
- 토픽/대화목록은 특정 게시판 내부의 메시지들 (**게시물**이라고 불리기도 합니다) 의 묶음입니다
- 게시물/메시지는 특정 토픽에 대하여 사용자가 제출한 메시지 입니다.

소개

응용프로그램 메뉴 안의 게시판 메뉴는 2개의 링크를 표시합니다, 하나는 게시판 목록에 대한 것이고, 다른 하나는 게시판 순위에 대한 것입니다.

사용자로서, 귀하는 응용프로그램 메뉴 내부의 게시판 링크들을 클릭하여 게시판 구역에 입장할 수 있습니다.

원하는 바에 의하여 게시판 목록을 정렬할 수 있으며 게시판에 입장하기 위하여 게시판명을 클릭할 수 있습니다.

게시판에 입장하면, 토픽들의 목록이 표시될 것입니다:

토픽은 게시판에 대한 토픽 세트에 대한 기본 순서를 사용하여 나열됩니다, 사용자로서 귀하는 토픽을 토픽 목록 안의 필드 중 아무것에 의하여 정렬할 수 있습니다. 유형은 토픽을 분류하기 위하여 사용됩니다 (뒤에 추가 설명). 토픽 아이콘이 (이 경우와 같이) 붉게 표시되면, 해당 토픽은 해당 사용자에게 새로운 것입니다. 토픽을 게시할 권한을 보유하고 있다면, 새 토픽을 게시할 양식을 표시하기/감추기를 할 링크를 보게될 것입니다. 다음은 표시되었을 때의 양식입니다:

You will have to enter the title for the topic, the type and the comment (the topic text), you can use some smileys shown at the right if you want. The topic-type that you can set will be normal unless you are an admin for this forum, in which case you can use any type. Topics type are described next:

Type	Icon	Description
Normal		A normal topic
Hot		A hot topic, a topic that is very important or polemical or anything you consider hot
Announce		An announcement
Sticky		A sticky topic will be displayed on top of the list of topics regardless of the ordering selected for topics.
Locked		A locked topic is a topic where users cannot post messages, admins can lock a topic by changing the type of any topic to locked

If you click on the topic name for any topic a list of topic messages will be displayed:

From this screen you can post new messages (if you have the permission), edit or remove messages (again

if you have the permission) and quote a message if you want. The form to post a message for a topic is almost identical to the form used to post a new topic.

The toolbar can be used to sort messages by date, score or title, limit the minimum score for a message to be displayed (threshold) or find messages containing some word.

Forum Rankings

The forum rankings screen can be used to display rankings for the forums.

How to get the forum messages by email ?

There are five ways to monitor messages:

1.1.1. Monitor all messages from the forum

Like it usually works in email lists: copies are received from the initial messages (new topics) from all the new discussion threads, as well as from all their answers.

You need to click on the right icon when looking at the topics list from a forum. For instance:

Uso de la Web

Foro para resolver dificultades en el uso de esta web. Escribe aquí tus preguntas y se te responderá muy pronto.

Foros > Uso de la Web

[Nuevo tema](#) [Lista de foros](#) [Editar Foro](#)

RSS

Monitor Topics and Threads of this Forum

1.1.2. Monitor only the initial message from all the new discussion threads from this forum.

You need to click in the eye icon on the left when looking at the topics list of a forum. For instance:

Uso de la Web

Foro para resolver dificultades en el uso de esta web. Escribe aquí tus preguntas y se te responderá muy pronto.

Foros > Uso de la Web

[Nuevo tema](#) [Lista de foros](#) [Editar Foro](#)

RSS

Monitor Topics of this Forum

(this way, you don't automatically get by email the answers from the new discussion threads, if we don't subscribe to them; see next step)

1.1.3. Monitor the answers to specific discussion threads.

You need to click on a specific discussion thread in a forum, and click on the eye icon on the right of the initial message from that discussion thread. For instance:

Foro: Uso de la Web

[Editar Foro](#)

Foros > Uso de la Web > Fallos nueva versión de la web

[tema ant]

Fallos nueva versión de la web

Hola chicos, gracias por el trabajo de actualizar la versión, pero he encontrado un fallo...
Si accedes con Firefox desde windows (el mio es XP) y te registras (log in) desaparecen los menus de la izquierda y derecha de la página. Es decir, entras en la zona de trabajo sin los menus, si vuelves a la portada poniendo la dirección de la página aparecen, pero si pinchas en cualquier apartado vuelven a no estar. Es un poco incómodo y sólo pasa si te has registrado, si entras sin usuario todo está normal. Con internet explorer no sucede este error.
Lo siento... espero que sea fácil de arreglar.
Gloria

[Responder](#)

On 2.0, when you start a new thread you have the option to select monitoring that thread just at posting time (and selected by default):

Title: Hey, forums on 1.10 rock!

Type: normal

Edit: [Icons for formatting: bold, italic, underline, link, unlink, image, video, audio, code, quote, spoiler, etc.] Admin Quicktags

Heya, this is much more useful to allow new users get email notices when somebody replies to them!

Watch for replies: ☒ Send me an e-mail when someone replies to my topic ☐ Don't send me any e-mails

Post: [Preview] [Post] [Cancel]

1.1.4. Monitor the forum by "group watch"

An admin of the site can set up your tiki to send messages to selected groups of users when there are some changes in objects of the tiki site, such as a forum. Once [Group watch](#) is enabled tiki wide by an admin, a few new icons will show up to the right of the previous ones, allowing the admin to set which groups have to receive emails:

Uso de la Web

Foro para resolver dificultades en el uso de esta web. Escribe aquí tus preguntas y se te responderá muy pronto.

Group Monitor Topics and Threads of this Forum

[Buscar](#)

1.1.5. Monitor the forum by categories

Additionally, in Tiki 2.0 you can [watch](#) a categorized forum through watching the category that it belongs to.
