Mod xspf player

**XSPF** Web Music Player is a flash-based web application that uses xspf playlist format to play mp3 songs. XSPF is the XML Shareable Playlist Format. The software is written in Actionscript 2.

See http://musicplayer.sourceforge.net/ for more information

#### Install

See Mods Admin for instructions on how to install a Mod.

# Usage

Once installed, you will see some new lines under the Wiki "edit > wiki help > Show Plugins Help":

 ${XSPF(song=url\_to\_mp3,playlist=url\_to\_xspf\_playlist,player=full|slim|button,autoplay=true|false,title=text)}{XSPF}$ 

Info from sourceforce on the player.

from: http://musicplayer.sourceforge.net/#download

have no idea if the wikiplugin is supporting these.

# parameters:

playlist url: the url of the xspf file to load

autoplay: boolean value that make the music start without the initial user click autoload: boolean value that make the playlist load without the initial user click

 $repeat\_playlist: boolean\ value\ that\ make\ the\ repeats\ the\ playlist\ after\ the\ end\ of\ the\ last\ song\ playlist\_size$ 

: number of tracks to limit

player\_title : the text to replace the players default's

info button text: the text to display on the info link, see this page

 $radio\_mode: boolean\ value,\ if\ true\ tells\ the\ player\ that\ the\ last\ track\ of\ playlist\ is\ in\ real\ a\ new\ playlist$ 

location. more info

The music player can also be used to play single mp3 files instead of playlists, the parameters are:

song url: the url of the single mp3 you want to play

song title: the text to replace the players default's

If you want to use the button player, there is a test page to custom the button and generate the html code.

### Example

If this Mod is related to a plugin, the following code,

 ${XSPF(song=url\_to\_mp3,playlist=url\_to\_xspf\_playlist,player=full|slim|button,autoplay=true|false,title=text)}{XSPF}$ 

# Would produce:

(screenshot needed)
