

This page [needs review](#)  
Module last\_modif\_pages

This module displays the most recently edited [wiki pages](#), in reverse chronological order, and provides a link to each page.

## Parameters

List the specified number of pages, starting from the most recently modified.

[Go to the source code](#)

*Preferences required:* feature\_wiki

Parameters	Accepted Values	Description	Default	Since
<code>absurl</code>		If set to "y", some of the links use an absolute URL instead of a relative one. This can avoid broken links if the module is to be sent in a newsletter, for example. Default: "n".		
<code>action</code>		If set to "y", show action performed on the pages. ( y / n )		
<code>comment</code>		If set to "y", show the descriptions of the change made on the pages. ( y / n )		
<code>date</code>		If set to "y", show page edit dates. ( y / n )		
<code>url</code>		Target URL of the "...more" link at the bottom of the module. Default: tiki-lastchanges.php		
<code>user</code>		If set to "y", show who edited the pages. ( y / n )		
<code>maxlen</code>	int	Maximum number of characters in page names allowed before truncating.		
<code>maxcomment</code>	int	Maximum number of characters in comments allowed before truncating.		
<code>days</code>	int	Number of day in past to look for modified pages. Defaults to "356"		
<code>show_namespace</code>		Show namespace prefix in page names. ( y / n )	y	

## Usage

You will see it listed at "Admin > Modules > Assign new module > Module Name (drop down)" (**tiki-admin\_modules.php**).

You can assign a this [Module](#) to a lateral column (See [Module Admin](#) page if needed), or you can include it within a wiki page, using the [PluginModule](#).

---

```
{MODULE(module=>last_modif_pages) /}
```

See [PluginModule](#) for additional parameters that can be used.

The assigned module looks like this:

## Latest Changes

1. [Heading](#)
2. [Adding fields to a tracker](#)
3. [Items List and Item Link Tracker Fields](#)
4. [Documentation](#)
5. [Email filters](#)

[...more](#)
