

This is a starter page to help document complex use of [PluginCustomSearch](#) and [PluginList](#). It uses Smarty templates and JavaScript/jQuery to achieve date searches on Tracker data in related Trackers, and depends on Elasticsearch for the facet/aggregation generation and works in Tiki 18.x.

Initially a non-working dump of the (slightly simplified) files and pages:

Pages

The top level wiki page

```
! Monthly Statistics {DIV(class="monthly-stats")}
{CUSTOMSEARCH(tpl="themes/templates/monthly_statistics_search_form.tpl"
searchfadediv="customsearch_0_results" recalllastsearch="0" searchonload="1" requireinput="0"
forcesortmode="0" searchfadediv="customsearch_0_form" customsearchjs="1")} {filter
field=tracker_id content="3"} {facet name="tracker_field_projectCompany" operator="or"
count="200" order="_term_asc" min="0"} {pagination max="300"} {tablesorter server="n"
sortable="y" sortList="[0,0]"
tsortcolumns="type:n|type:digit|type:digit|type:digit|type:digit|type:digit|type:digit|type:digit"
tsfilters="y"
tstotals="type:none|type:col;formula:sum;filter:visible;label:Totals|type:col;formula:sum;filter:visible;la
bel:Totals|type:col;formula:sum;filter:visible;label:Totals|type:col;formula:sum;filter:visible;label:Totals|
type:col;formula:sum;filter:visible;label:Totals|type:col;formula:sum;filter:visible;label:Totals|type:col;fo
rmula:sum;filter:visible;label:Totals"} {output
template="themes/templates/monthly_statistics_list.tpl"} {CUSTOMSEARCH} {DIV}
```

monthly_statistics_search_form.tpl

```
{literal} <div class="clearfix stats-search"> {* add dropdown for months and year from May 1st*}
<select id="daterange-presets" class="ignore"> <option value=""></option> <option
value="year">{tr}Financial Year To Date{/tr}</option> <option
value="1">{tr}January{/tr}</option> <option value="2">{tr}February{/tr}</option> <option

</tr>

```

Finally the JavaScript Bit

```

$(document).ready( function() { // set up month selector dropdown $("#daterange-
presets").change(function () { var val = $(this).val(), $from = $("#date_from_dptxt"), $to =
$("#date_to_dptxt"), now = new Date(), year = now.getFullYear(); if (val === "year") {
$from.datepicker("setDate", "1/05/" + year).change(); $to.datepicker("setDate", now).change(); } else {
val = parseInt(val); $from.datepicker("setDate", "1/" + val + "/" + year).change(); if (val === 12) { val
= 0; year++; } $to.datepicker("setDate", "1/" + (val + 1) + "/" + year).change(); }
$("#table#wpcs-0").find("th:first-child").trigger("sort"); $csForm.submit(); }); });

```
