Plugin Include

Use this [wiki plugin](#) to include the contents of a Wiki page inside another page (it <u>must</u> be a Wiki page located in the Wiki section of your Tiki, as other types of pages won't work yet!). This is a form of [Wiki transclusion](#)

Parameters

Plugin Manager error: include plugin not found

Example

This example transcludes (or includes) portions of the page [Tiki2](#) between the strings Authentication and OpenID.

This code:

```
{include page="Tiki2" start="!!!# Authentication" stop="!!!!# OpenID"}
```

Would produce on this site:

Authentication has received a major enhancement.

Some new options

- Use login as email
- Crypt passwords method
- User trackers at registration

Limitations

You can not include a same page or a same page extract more than 5 times on one page. If you need to exceed 5 times you will have to modify the plugin and change the value of `max_inclusions` . Starting in Tiki 18.2, there is a parameter to do so.
