

PluginPreview

A [Wiki Plugin](#) added to [Tiki18](#)

A Wiki Plugin to preview files from the file gallery. Allows the user to generate animated gifs from videos, and scaled previews for images and videos.

Starting in [Tiki20](#), can preview more file types via [unoconv](#). It requires appropriate tools on the server to convert file to HTML. See requirements at <https://packagist.org/packages/media-alchemyst/media-alchemyst> , and these have been added to Tiki [Check](#).

Parameters

Plugin Manager error: preview plugin not found

Preview PDF and other documents

The preview pdf and other document formats, media-alchemyst package is required.

Also ensure that the system is configured to avoid Document to Image conversion issues. [Media-Alchemyst - Document to Image issues](#)
