[Go to the source code](#)

*Preferences required:* wikiplugin\_quote

| Parameters              | Accepted Values | Description                                                                 | Default | Since |
|-------------------------|-----------------|-----------------------------------------------------------------------------|---------|-------|
| (body of plugin)        |                 | Quoted text                                                                 |         |       |
| <code>date</code>       | date            | Date when the statement quoted was made<br>( <code>YYYY-MM-DD</code> )      |         | 16    |
| <code>replyto</code>    | text            | Name of the quoted person.                                                  |         | 1     |
| <code>source_url</code> | text            | The URL to the source quoted.                                               |         | 16    |
| <code>thread_id</code>  | text            | The thread Id of the comment being replied to in forums. Overwrites replyto |         | 15    |

Examples

*This code:*

```
{QUOTE(replyto="admin")}Don't quote me on that{QUOTE} {QUOTE()}Anonymous quote{QUOTE}
```

*Would produce on this page:*

*admin wrote:*

```
| Don't quote me on that
```

“

```
| Anonymous quote
```
