

Plugin RSS

Use this [wiki plugin](#) to display items received from an external RSS feed that has been set up in the external feed feature (at `tiki-admin_rssmodules.php`). See [External Feeds](#) on how to set up Tiki to receive external feeds, which will need to be done first before using this plugin. For outgoing RSS feeds, see [Feeds](#).

Parameters

Plugin Manager error: rss plugin not found

Usage notes

- `feedId` is the id of the feed set up at *Settings > External Feeds* (or `tiki-admin_rssmodules.php`), `max` is the number of shown entries, `date` and `author` (optional) are added if set to `1`, and hidden if set to `0`, `desc` is a short description of the current rss item (optional).

You can also combine feeds by indicating `1:2`, or `1:2:3` to add feeds together. Note, however, that if you are combining feeds, "show publish date" must be checked in the Feeds module settings, in order to allow this plugin to sort the combined feeds.

Examples

Let's say you wish to display the list of last 3 items of a feed with the Id of 1 inside a Wiki page. Simply include this in your page, with date, but no author:

```
{rss id="1" max="3" date="1" author="0" desc="1"}
```

On this site, this would produce:

- [My thoughts on Cypht Webmail](#) (Tue 07 May, 2024)
Over the last 5 years, I have become increasingly involved in Cypht, an Open Source webmail client. This project is awesome! It permits me to: aggregate emails from various sources in one nice list search throughout multiple accounts move emails to the right account (work vs personal vs volunteer, etc.) automate email management with Sieve filters all via a web interface, so I have the same experience on all my devices (mobile or desktop)
- [WikiSuite is 13 years old!](#) (Mon 11 Mar, 2024)
So I launched this 13 years ago! I am very pleased with the current state and progress. It will just get better and better as the community grows Here were the initial vision/goals/plans: A slideshow: <https://wikisuite.org/Initial-Slideshow> An interview (in French): <https://wikisuite.org/Initial-Interview> It was originally called "Tiki Suite" as a suite of tools around Tiki Wiki CMS Groupware, and also because suite also means next in French. So the next step for Tiki
- [A giant in Open Source: Jonny Bradley's 10,000 Commits to Tiki Wiki CMS Groupware](#) (Thu 25 Jan, 2024)
In the dynamic realm of Open Source collaboration, where lines of code narrate tales of dedication, Tiki Wiki CMS Groupware stands out as a versatile and robust platform, empowering communities with a comprehensive suite of content management, collaboration, and communication tools. Within this vibrant ecosystem, Jonny Bradley reflects the spirit of community-driven projects. With over 10,000 commits to Tiki Wiki CMS Groupware, Jonny's journey represents more than a numerical milestone; it's a saga of commitment, growth, and the enduring power of shared passion.

Now you want the same using a "Ticker like" effect:

```
{rss id="1" max="3" date="1" author="0" desc="1" ticker="1" desclen="50"}
```

Smarty Feeds Function

You can also include a feed in a wiki page by using the Feeds Smarty function (`lib\smarty_tiki\function.rss.php`). Its usage is:

```
{rss id="5" max="10"}
```

Parameters for Smarty Function

id	ID	mandatory	ID of the rss
max	number	optional	max number of objects to show
skip	numbers separated by comma	optional	the objects to skip. Ex: 1,3 will skip the first object and the third one

The jQuery Sortable Tables feature must be activated for the sort feature to work.
