

This experimental feature was removed before [Tiki19](#) because

- it was not really working
- no one was working to improve it
- and it duplicated existing functionality
 - [PluginTrackerList](#) for simple reports
 - [PluginList](#) for advanced reports

Details: <https://tiki.org/forumthread67333-Let's-remove-unmaintained-PluginReport>

Plugin Report

Introduced in [Tiki9](#), use this [wiki plugin](#) to build a [Report](#), store it in a wiki page, and edit it from the page itself.

Parameters

Plugin Manager error: report plugin not found

Examples

Example of code to use for a report, generated from the edit report interface:

The screenshot shows the 'Report Builder' interface on the demo.tiki.org website. The 'Report Type' is set to 'Tracker' and the 'Tracker' is 'Time sheet - 4'. The 'Join Tracker' button is highlighted. The 'Search' field contains 'Summary - 12'. The 'Status' dropdown has 'o', 'p', and 'c' checked. The 'Fields' section lists several fields: 'Summary - 12', 'Associated project - 13', 'Description - 14', 'Amount of time spent - 15', and 'Done by - 16', all of which are checked. A modal window titled 'Wiki Data Output For REPORT Plugin' is open, displaying the following code:

```
{REPORT()  
type : Tracker  
tracker_value : 4  
tracker_search_0_value : 12  
tracker_status_0_value : o  
tracker_status_1_value : p  
tracker_status_2_value : c  
tracker_fields_0_value : 12  
tracker_fields_1_value : 13  
tracker_fields_2_value : 14  
tracker_fields_3_value : 15  
tracker_fields_4_value : 16  
(REPORT)}
```

Below the modal, there are 'Preview', 'Wiki Data', and 'Export As CSV' buttons. A preview table shows three rows of data:

A	B	C	D	E
1 Summary - 12	Associated project ...	Description - 14	Amount of time sp...	Done by - 16
2 Watch TV		Taking it easy 	5	
3
