

Plugin Subscribe Group

Introduced with [Tiki 2](#)

If you have allowed users to subscribe themselves to (join) a group, you can use this [wiki plugin](#) to allow them to subscribe/unsubscribe to a specific group. Please see [PluginSubscribeGroups](#) for a similar plugin for subscribing/unsubscribing to more than one group.

Security and permissions

- A user must have the perm `tiki_p_subscribe_group` to be able to see the box
To set this permission go to *Settings > Groups*
- The group must be set as being a **user choice**
To set this configuration go to *Settings > Groups*

Parameters

Plugin Manager error: subscribegroup plugin not found

Usage notes

- If you use this plugin with the plugin GROUP, be careful that if GROUP is used first, the change will not immediately be shown. GROUP used after SUBSCRIBEGROUP will be fine
- A module with a filter on the group will be affected as soon as the group is changed

Examples

Basic

This code:

```
{subscribegroup group="Editors" subscribe="Subscribe to %s" unsubscribe="Leave %s"
subscribe_action="Name of subscribe submit button" unsubscribe_action="Name of unsubscribe
submit button"}
```

Would produce:

or this screen

Advanced

It is possible to make a link to toggle from subscribed/unsubscribed status to some group called **GroupName** by creating a link to a page which contains this plugin and adding the following parameters:

```
group="GroupName&iSubscribeGroup=1&subscribeGroup=text"
```

Example:

```
http://www.example.com/somepage?group=GroupName&iSubscribeGroup=1&subscribeGroup=text
```

Of course, this works if the user is logged in, and **GroupName** needs the correct spelling and

capitalization.
