

Plugin Translated

A quick [wiki plugin](#) for help with multi-lingual links. It's really a freeform linker, so it can be used in multi-tiki lingual setup, or for smaller website with all translated content internally, anything.

Parameters

Plugin Manager error: translated plugin not found

Example

```
{TRANSLATED(flag="France" lang="fr")}[url] or ((wikiname)) or ((inter:interwiki)) (use wiki syntax){TRANSLATED}
```
