

Tiki Manager Package

Starting in [Tiki25](#), [Tiki Manager](#) can be added as a [Package](#) to any Tiki instance. It has many uses, including [Automatic updates](#). This replaces the standalone [Tiki Manager Web UI](#) with something more robust and flexible.

Command Line

2022-04-15 14:33:30

When the Tiki Manager Package is installed, these commands appear in php tiki-console.php

gallery	Migrate images from the Image Gallery to the File Gallery
gallery:migrate	
goal	Reviews all active goals and assigns rewards.

manager:webmanager:enable	
ml	Train a particular machine learning model
ml:train	
multitiki	List MultiTikis in a path
multitiki:list	Moves a MultiTiki site from one tiki instance to another
multitiki:move	
notification	Send out email notification digests
notification:digest	

Web Interface

As of 2022-07-05, this is functional in trunk, but for more interactivity and reliability, we will add support

for [Realtime](#).

Back-end admin panel

See the Tiki Manager link in the admin menu ([tiki-ajax_services.php?controller=manager&action=index](#)). This is the full back-end interface

Tracker field

[Tiki Manager Tracker Field](#) is for when you want to have meta data associated to your instances, or if you want to launch Tiki instances from Tracker items.

Wiki Plugins

- [PluginTikiManager](#) is for when you want to present a simple user interface, with a subset of functionality.
- [PluginTikiManagerClone](#)
- [PluginTikiManagerUpdate](#)

Virtualmin

- If you connect to a Virtualmin instance, you get even more features:
<https://wikisuite.org/Tiki-Manager-Package-connecting-to-Virtualmin>

Development

- Initial code: https://gitlab.com/tikiwiki/tiki/-/merge_requests/1374
- Development ideas: [Tiki Manager within Tiki](#)
