

Rating Tracker Field

This is a [stub](#)

Introduced in [Tiki8](#), this is the corresponding tracker field to the feature [Rating](#) and [Advanced Rating](#).

In [Tiki12](#), at least, you have 3 modes:

- Stars
- Radio Buttons
- Single option: e.g. Like

You can also set the labels to something else different from the real values that will be stored for the calculation of average, etc.

In this example, below, the tracker field Rating was set with:

- Option: -2,-1,0,1,2
- Mode: Stars
- Labels: -2,-1,0,1,2

Tracker: Bugs & Wish list

The screenshot shows the 'Tracker: Bugs & Wish list' interface. At the top, there are two buttons: 'Trackers' and 'View Items'. Below them, a message reads: 'If this is your first time, please read: [How to Submit a new item on the Wish](#)'. The main section is titled 'Tracker Items' and has an 'Insert New Item' button. It shows 'Items found: 1552'. The table has columns for 'New Rating', 'Subject', and 'Subj'. The first item is 'Monitoring pre-dogfood servers' with a rating of 1. The second item is 'Together: make it work for wiki pages, spreadsheet, drawing,' with a rating of 2. A tooltip is visible over the rating stars for the second item, showing 'Number of votes: 2, Average: 1.5, Your rating: 2'. The third item is 'Screencasts in comments: no longer showing' with a rating of 1.

New Rating	Subject	Subj
1	Monitoring pre-dogfood servers	marc
2	Together: make it work for wiki pages, spreadsheet, drawing,	marc
1	Screencasts in comments: no longer showing	marc
