

Documentation Status Page Updated to new tagging system

👤 dthacker - Thu 28 Dec, 2006 07:59 GMT-0000 - (13591 Reads)

Help Wanted

We've made some changes to the Documentation Status page that will help keep things up to date. Take a look!

Over that last several weeks, we've moved the Documentation Status page to a new system. We're now using [backlinks to index](#) to show pages that need attention. We've created a new Documentation Lifecycle document that explains the new status tags, and a How To Tag reference page that will show you how to use tags to help documents move to final production status. This idea was conceived and created by mlpvolt, and dthacker pitched on the supporting documents. Please take a few moments to review these documents and start applying tags as you find opportunities to improve the docs. If you have any questions, please drop me an internal message or catch me on irc. Thanks for your help.
