default

description

Data channels are templates that can be applied from a post request. They can be used to automate work on more complex installations.

warning

There are security considerations related to using data channels. Make sure the profile page is controlled by administrators only.

hint

Data channels create a named pipe to run profiles from user space. One channel per line. Each line is comma delimited and contains \_\_channel name, domain, profile, allowed groups, (optional) \$profilerequest:input\$ matches to groups\_\_.
