

Search Stats

If you enabled the [Search](#) feature, you can also enable the search statistics at "Admin home > Search > Search features > Search stats".

The screenshot shows the 'Search Results' tab in the Tiki Admin interface. Under the 'Features' section, the 'Search stats' checkbox is checked and circled in red. Other settings include 'MySQL Full-Text Search' (checked), 'Tiki-indexed Search' (unchecked), 'Search Bar' (checked), 'Referer Search Highlighting' (unchecked), and 'Parse the results' (checked). The 'Permissions' section contains a warning and two unchecked options: 'Ignore individual object permissions' and 'Ignore category viewing restrictions'.

General Settings | Search Results

Search type ⓘ

- ☒ MySQL Full-Text Search ⓘ ➡
- ☐ Tiki-indexed Search ⓘ

Unless you have a reason to, you should use MySQL Full-Text Search feature instead.

Features

- ☒ Search Bar
Requires [MySQL Full-Text Search](#) (OK)
- ☐ Referer Search Highlighting ⓘ
- ☒ Parse the results
May impact performance
- ☒ Search stats ⓘ ➡

Permissions

ⓘ Enabling these options will improve performance, but may show forbidden results.

- ☐ Ignore individual object permissions
- ☐ Ignore category viewing restrictions ⓘ

Will improve performance, but may show forbidden results

Then, you can access them under "Admin > Search stats", which will lead you to "**tiki-search_stats.php**":

The screenshot shows the 'Search stats' page with a 'clear stats' link, a search input field, and a table of search statistics.

term	searched
	11828
search	5293
for...	4236
wiki	3245
page	2866
table	2591

This page should be edited and inserted into the Search section of the Tiki Admin Guide
